

Re: Cleaning, Disinfecting or Sterilising on CO₂ Source Tubing Adapter

GA Health holds a mission to develop effective solutions for infection prevention for patients through innovative design that prioritise our users' needs.

The Andorate CO₂ Source Tubing Adapter (GAR093 and GAR108) is used to connects the gas outlet port of the CO₂ insufflator and provides a connection for the CO₂ Source Tubing or extended tubing for connection.

Once attached to the CO₂ insufflator, the CO₂ Source Tubing Adapter shall be treated as part of the insufflator accessories. The cleaning or disinfection method shall therefore follow the local hospital's infection control guidelines to determine appropriate high-level disinfection or sterilisation process.
