

# SMS Endoscopy is committed to delivering comprehensive management solutions for **endoscopy equipment**

## Fujifilm

SMS Endoscopy is an authorized distributor and service center for Fujifilm endoscopy equipment. SMS Endoscopy flexible endoscope repair department has extensive experience and capability to repair Olympus, Fujifilm and Pentax flexible endoscopes used in endoscopy and surgery.

## Endoscope Management

SMS Endoscopy provides Certified Pre-Owned endoscopy equipment from all manufacturers. Equipment “life span” management and multi-year “Point of sale” service coverage. SMS Endoscopy also provides compliancy based “Elite Customer Service Agreements”.

## GI Help Desk

SMS offers comprehensive educational resources for all our customers. The GI Help Desk has free online GI specific CEU programs and a platform to ask questions that will be answered by a GI nurse specialist. It also includes up to date “hot topic” articles, standards and guidelines for your quick reference.

## ScopeCycle

Complete end-to-end scope/patient tracking solution, making the burdensome task of manual scope documentation a thing of the past. From storage to reprocessing, each scope is individually tracked to ensure compliance with all manufacturers’ recommended usage and cleaning protocols.

## Endo-Leak Tester & Endo-Flush

The Endo-Flush automatically flushes all channels of an endoscope and provides consistent, hands free flushing. The Endo-Leak Tester is used as an early detection tool to identify internal or external leaks in an endoscope.

# Zutron Medical can make your day easier with our top of the line **infection prevention products**

## Endoscopy Procedure Kits

Our custom procedure kits are built just the way you want them, with only the products you specify. Start with our standard kit, modify it, or go 100% custom. These procedure kits bring standardization, reduced product handling and one catalog number convenience. Creating a procedure kit with one catalog number reduces the number of supply touchpoints for better supply efficiency.

## Suction, Air/Water, Biopsy Valves & Check Valves

The air water valve system is a complete single-use solution that performs at a 0.01% margin of error when operated under recommended guidelines. The 3 piece set contains Suction, Air/Water & Biopsy Valves. The 4 piece set contains Suction, Air/Water, Biopsy & Check Valves.

## 80+ Kit Components

Our online tool helps you choose from over 80 items such as basins, brushes, gauze, gowns, lubricant, pads, sponges, suction tubing, and much more. These custom procedure kits are built just the way you want them.

## Custom Packaging

Individually packed, bulk packed, or a combination of the 2, we give you the option to choose how you want your kits packaged and shipped to save time and cost.
